

Internship

Data Structures and Algorithms Cipher School	June 2024 - July 2024
- Completed a Data Structures and Algorithms (DSA) internship using Java at Cipher School. - Achieved certification for excellent performance in coding assignments and projects. - Implemented key data structures and algorithms with a focus on efficiency and optimization.	

Projects

Phishing Simulation Tool	May 2025
- Created a phishing simulation tool to demonstrate credential harvesting ethically. - Designed realistic login page clones for Facebook, Instagram, and Twitter using HTML, CSS, and JavaScript. - Implemented a Python-based backend to capture and store user credentials locally. - Educated users about phishing risks and strengthened security awareness.	

Tech: HTML, CSS, JavaScript, Python

Shield- Password strength checker	December 2024
- Developed a C/C++-based Password Strength Checker that evaluates password security using multiple criteria. - Implemented an algorithm to assess password complexity and classify it as "Weak," "Medium," or "Strong," enhancing cybersecurity awareness. - Utilized core Java concepts, including string manipulation, loops, conditional statements, and character validation, to analyze password strength efficiently. - Designed for real-world applications, helping users create stronger passwords to improve data security and prevent unauthorized access.	

Tech: C++/C

Community Development Project	June 2023 – July 2023
- Fieldwork- Arranged a learning program, “Child Education” for children in slum areas. - Promoted awareness among parents and families about the significance of education and its long-term benefits. - Designed educational materials, demonstrated practical exercises, and inspired children to participate enthusiastically.	

Certificates

Ethical Hacking Essentials Coursera	October 2025
Digital Forensics (DFE) Coursera	October 2025
Java and Data Structures & Algorithm Program Cipher Schools	July 2024
Generative AI with Large Language Models Coursera	July 2024
Introduction to Cybersecurity Tools & Cyberattacks Coursera	June 2024
ChatGPT Advanced Data Analysis Coursera	May 2024
Introduction to Cybersecurity Essentials Coursera	April 2024

Skills

Languages: C, C++, Python, Java.

Frameworks: HTML, CSS, JS, BootStrap.

Operating Systems: Windows, Linux, MacOS.

Tools/Platforms: MySQL, Wireshark, Nmap, Ubuntu.

Soft Skills: Strong Analytical Skills, Team Work & Collaboration, Communication, Leadership, Problem Solving

Extra-Curricular/Co-Curricular

Project Contributor Outlier : Enhanced Data integration and analytics	February 2025
Problem Solving HackerRank : Solved 100+ coding challenges, enhancing algorithm and programming skills.	December 2024
Captain School Cricket Team : Led the team to win the District Championship	July 2020

Education

Lovely Professional University	2022 – 2026
Bachelor of Technology – Biotechnology: CGPA: 6.0	Jalandhar, Punjab
Global International School	2020 – 2022
12th with Science — Percentage: 65%	Muzaffarpur, Bihar
Delhi Public International School	2019 – 2020
10th with Science — Percentage: 75%	Muzaffarpur, Bihar
